Financial Cryptography and Data Security
February 27 – March 2, 2012, Divi Flamingo Beach Resort, Bonaire -
http://fc12.ifca.ai/

Financial Cryptography and Data Security is a major international forum for research, advanced development, education, exploration, and debate regarding information assurance, with a specific focus on commercial contexts. The conference covers all aspects of securing transactions and systems. Original works focusing on both fundamental and applied real-world deployments on all aspects surrounding commerce security are solicited. Submissions need not be exclusively concerned with cryptography. Systems security and inter-disciplinary works are particularly encouraged.

TOPICS

CALL FOR PAPERS, PANELS, WORKSHOPS & IMPORTANT DATES

Submissions are sought in the following categories: (i) regular papers (15 pg LNCS format), (ii) short papers (8 pg), (iii) panels and workshops (2 pg), and (iv) posters (1 pg). Submissions need not and should not be anonymized.

Workshop Proposal Submission: July 27, 2011 (notification on August 30, 2011)
Paper Submission: September 15, 2011 (notification on November 18, 2011)
Poster and Panel Submission: December 2, 2011 (notification on December 12, 2011)
Final Papers: December 16, 2010

ORGANIZERS & PROGRAM COMMITTEE

General Chair: Rafael Hirschfeld, Unipay Technologies, Netherlands
Program Chair: Angelos D. Keromytis, Columbia University, USA

Mikhail Atallah, Purdue University, USA
Konstantin Beznosov, University of British Columbia, Canada
Mike Bond, Cambridge University, UK
Jan Camenisch, IBM, Switzerland
Sonia Chiasson, Carleton University, Canada
Nicolas Christin, CMU, USA
David Mandell Freeman, Stanford University, USA
Virgil Gilgor, CMU, USA
Dieter Gollmann, Technische Universitat Hamburg, Germany
J. Alex Halderman, University of Michigan, USA
John Ioannidis, Google, USA
Sotiris Ioannidis, FORTH, Greece
Stanislaw Jarecki, UC Irvine, USA
Somesh Jha, University of Wisconsin, USA
Jonathan Katz, University of Maryland, USA
Engin Kirda, Northeastern University, USA

Tadayoshi Kohno, University of Washington, USA
Wenke Lee, Georgia Tech, USA
Corrado Leita, Symantec Research Labs Europe, France
Arjen Lenstra, Ecole Polytechnique Federale de Lausanne, Switzerland
Ninghui Li, Purdue University, USA
Helger Lipmaa, Cybernetica AS, Estonia
Tal Malkin, Columbia University, USA
Patrick McDaniel, Penn State University, USA
Catherine Meadows, Naval Research Labs, USA
David Molnar, Microsoft Research, USA
Fabian Monrose, University of North Carolina, USA
Anil Somayaji, Carleton University, Canada
Jessica Staddon, Google, USA
Angelos Stavrou, George Mason University, USA
Carmela Troncoso, KU Leuven, Belgium
Lenore Zuck, University of Illinois at Chicago, USA
FURTHER SUBMISSION INFORMATION

Papers must be formatted in standard LNCS format and submitted as PDF files. Submissions in other formats will be rejected. All papers must be submitted electronically according to the instructions and forms found on the submission site. Post-proceedings of the event will be published by Springer in the Lecture Notes in Computer Science series.

Authors may only submit work that does not substantially overlap with work that is currently submitted or has been accepted for publication to a conference/workshop with proceedings or a journal. We consider double submission serious research fraud and will treat it as such. In case of doubt contact the program chair for any clarifications at fc12chair@ifca.ai.

 Regular Research Papers. Research papers should describe novel, previously unpublished scientific contributions to the field, and they will be subject to rigorous peer review. Accepted submissions will be included in the conference proceedings to be published in the Springer-Verlag Lecture Notes in Computer Science (LNCS) series. Submissions are limited to 15 pages.

 Short Papers. Short papers are also subject to peer review, however, the intention is to encourage authors to introduce work in progress, novel applications and corporate/industrial experiences. Short papers will be evaluated with a focus on novelty and potential for sparking participants' interest and future research avenues. Short paper submissions are limited to 8 pages in standard LNCS format. The paper title for short papers must include the text '(a short paper)'.

 Panel Proposals. We especially would like to encourage submissions of panel proposals. These should include a very brief description of the panel topics, as well as of the prospective panelists. Accepted panel sessions will be presented at the conference. Moreover, each participant will contribute a one-page abstract to be published in the conference proceedings. Please feel free to contact us directly if you would like to further discuss the suitability of a certain topic. Panel submissions should be up to 2 pages, sent to fc12chair@ifca.ai.

 Posters. The poster session is the perfect venue to share a provocative opinion, interesting established or preliminary work, or a cool idea that will spark discussion. Poster presenters will benefit from a multi-hour session to discuss their work, get exposure, and receive feedback from attendees. Poster submissions should be 1 page (in the same LNCS format). Please keep in mind that the poster deadline is later than the main paper submission deadline. The posters will be published in the proceedings. Poster proposals should be sent to the posters chair at fc12chair@ifca.ai.

 Workshop Proposals. Proposals for workshops to be held at FC 2012 are also solicited. A workshop can be full day or half day in length. Workshop proposals should include: (i) a title, (ii) a call for papers, (iii) a brief summary and justification -- including how it would fit into the greater FC scope, (iv) a (tentative) Program Committee and its Chair, (v) one-paragraph bios for key organizers, and (vi) the expected (or previous - if workshop has been held in previous years) number of submissions, participants and acceptance rates. Workshop proposals should be sent fc12workshops@ifca.ai.

 The Rump Session. FC'12 will also include the popular "rump session" held on one of the evenings in an informal, social atmosphere. The rump session is a program of short (5-7 minute), informal presentations on works in progress, off-the-cuff ideas, and any other matters pertinent to the conference. Any conference attendee is welcome to submit a presentation to the Rump Session Chair (to be announced at the conference). This submission should consist of a talk title, the name of the presenter, and, if desired, a very brief abstract. Submissions may be sent via e-mail, or submitted in person in the morning on the day of the session.

The Financial Cryptography and Data Security Conference is organized by The International Financial Cryptography Association (IFCA).
